Policies and Management Objectives for Sustainable Tourism

At **QUINTA GENERACIÓN S.A.S Y JAIMES COBOS SONIA**, we are aware of the importance of developing sustainable tourism in Colombia. Consequently, we are committed to adopting measures to reduce, eliminate, and prevent the negative impact our activities have on tourism sustainability (environmental, social, cultural, and economic). We are also committed to guaranteeing compliance with the requirements established in the Sectorial Technical Standards NTS-TS 006-1 and NTS-TS 003, which include legal requisites that regulate touristic activities and their subsequent effects. With this purpose, we will provide the necessary resources and training for personnel, who will also participate in other external opportunities for training.

To fulfill this commitment, the following objectives have been established:

- Encourage and manage a reasonable and efficient use of energy, water, and paper among clients and employees.
- Set up programs that minimize the negative environmental impact of the waste generated by each of the organization's processes.
- Create awareness of the importance of conservation and promote the proper use of Colombia's natural and cultural wealth as well as that of other destinations where events are carried out.
- Prevent the exploitation, violence, and sex trafficking of minors.
- Ensure compliance with current legislation that regulate the company's activities.
- Increase employees' professional development through ongoing workshops and training in a way that allows for continuous improvement.
- Compliance with scheduled equipment and facilities maintenance, guaranteeing an optimal operational state.
